

EEI – Energy Experts International

Energy Experts International (EEI) is a management consulting firm specializing in energy supply, delivery, and utilization systems. Established in 1998, EEI offers a comprehensive range of services across four primary areas:

1. **Management Consulting:** EEI provides strategic guidance on utility operations management, market development, regulatory issues, and clean energy alternatives. They assist clients in navigating rising energy costs and hedging risks, with a focus on sustainable energy strategies.
2. **Engineering Services:** The firm offers engineering and design services for natural gas and electric power systems, including applicant designs. Their expertise encompasses system engineering, design, and project coordination.
3. **Field Technical Services:** EEI provides field inspections and technical support for natural gas and petroleum pipelines, electric power systems, and valve and actuator services. They also offer pipeline inspection services to ensure safety and compliance.
4. **Renewable & Energy Efficiency Services:** The firm develops strategies for renewable energy integration and energy efficiency, conducting infrastructure and efficiency studies, and managing energy costs. They are at the forefront of clean energy solutions, including hydrogen alternatives and renewable resources.

EEI serves a diverse client base across the United States and internationally, with offices in Redwood City, California; Washington D.C.; Chicago; and Brussels, Belgium. Their commitment to providing premier consulting and technical services is evident in their extensive industry representation and involvement in professional organizations.
