

NGA Pre- Winter Briefing November 2025

**250,000 GPD liquefaction
4-truck loading bay
2 M gallons LNG tank**

**The largest DG and DSM resource in MA
Continuous methane leak detection
CO2 capture (working on its utilization)**

An aerial photograph showing a large solar field in the upper left, a gas-fired power plant in the upper right, a large industrial facility with a tall storage tank in the center, and a fiber optic manufacturing plant in the lower right. The entire area is surrounded by dense forest with autumn foliage. Callout boxes with leader lines identify each facility.

Solar field

Millenium Power
Plant (gas fired
CCGT plant)

Incom Inc
(fiber optic
manufacturer)

NEC LNG
Charlton

**NEC compliments
and enhances the
utilization of on-
system LNG
resources of New
England's local
gas distribution
companies**
