

PPM – Progressive Pipeline Management

Progressive Pipeline Management (PPM) is a full-service contractor specializing in trenchless pipeline rehabilitation, focusing on restoring aging, damaged, or leaking underground infrastructure. Their services include:

- **Cured-In-Place Lining (CIPL):** PPM is the exclusive licensee of the Starline® system in North, Central, and South America, utilizing this technology to rehabilitate gas distribution and pressurized water pipelines with minimal surface disruption.
- **Pipeline Inspection:** Conducting comprehensive inspections to assess the condition of pipelines, identifying issues such as leaks, corrosion, and structural weaknesses.
- **Pipeline Cleaning:** Employing advanced techniques to remove debris, scale, and other obstructions from pipelines, ensuring optimal flow and reducing the risk of blockages.
- **Pigging Services:** Utilizing pipeline inspection gauges (pigs) to perform cleaning, inspection, and maintenance tasks within pipelines without the need for excavation.
- **In-Line Robotics:** Deploying robotic technologies to inspect and repair pipelines from the inside, enhancing safety and efficiency.
- **Environmental and Decommissioning Services:** Providing solutions for the safe decommissioning of pipelines and associated infrastructure, including environmental assessments and remediation.

These services are designed to extend the lifespan of pipeline infrastructure, enhance safety, and minimize environmental impact.
