

Fall Operations Conference October 2025

Christian Rodrick
Director of Public Affairs
Northeast Gas Association

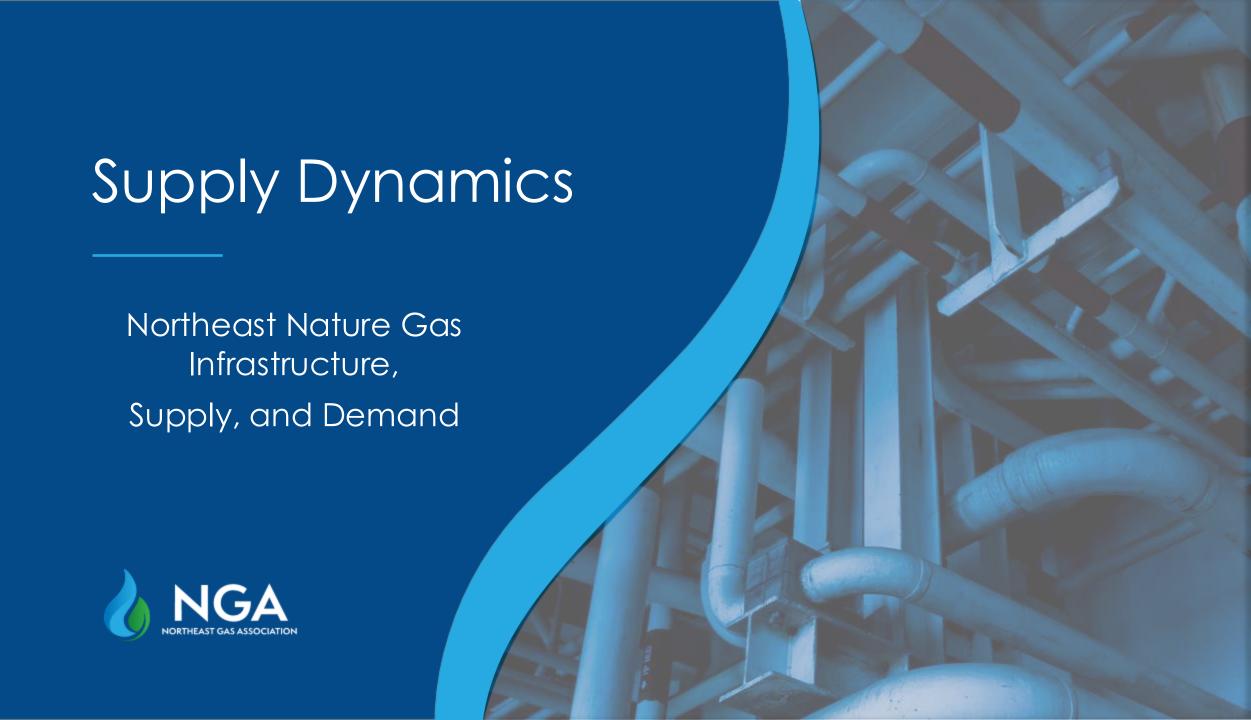

The Plan for Today's Presentation

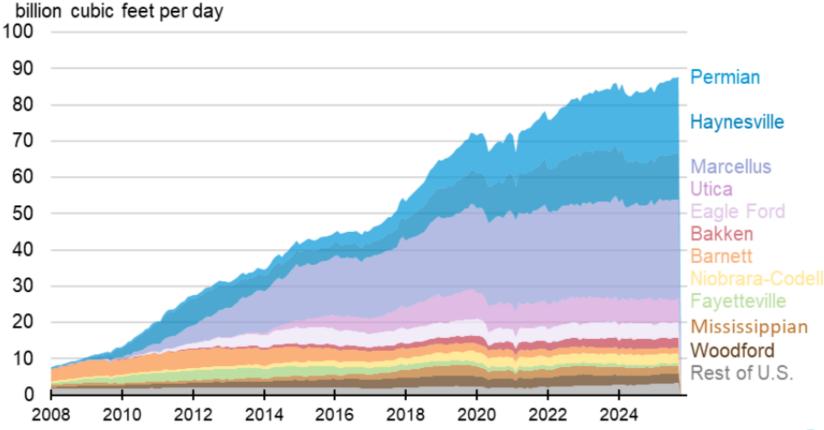

- 1. What role does natural gas play in the Northeast today?
- 2. What is the policy landscape?
- 3. What does the future realistically look like?

Shale Production Growth

Monthly U.S. dry shale natural gas production by formation

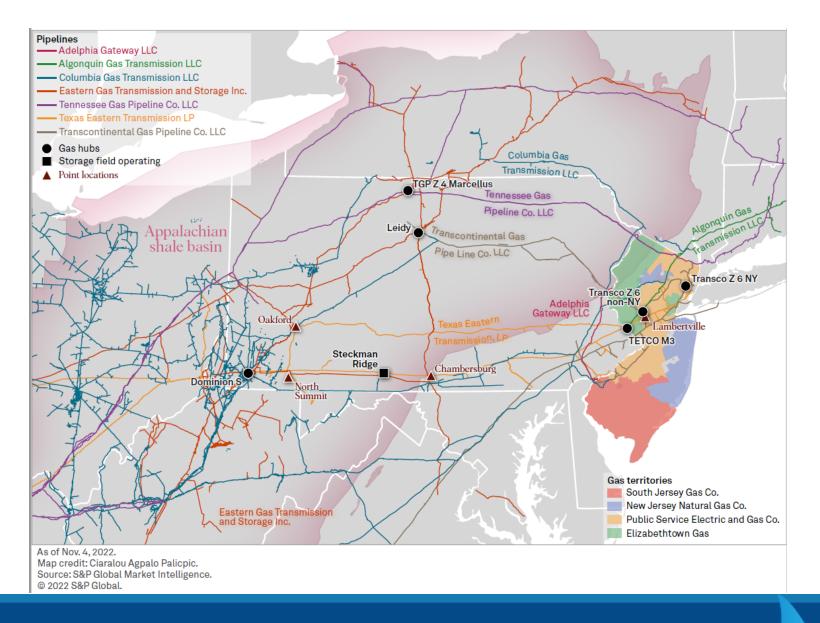

Data source: U.S. Energy Information Administration, Short-Term Energy Outlook, October 2025

New York & New England Regional Map

New England natural gas infrastructure map Sta 245 to Sta 249 East Hereford/Pittsburg Baileyville Waddington Flow: 927 MMcf/d Flow: -1 MMcf/d Flow: 313 MMcf/d Flow: 0 MMcf/d Change: -77 MMcf/d Change: 0 MMcf/d Change: -65 MMcf/d Change: 0 MMcf/d Utilization: 90.0 % Utilization: 0.1 % Utilization: 56.5 % Utilization: 0.0 % Portland Saint John (PNGTS) Maritimes & Northeast Iroquois (M&N) (IGTS) Granite Algonquin City Gate Northeast Gateway Tennessee (TGP) Algonquin (AGT) Trading point Sta 315 to MLV 316 **Southeast Compressor** MLV 256 to MLV 260 Flow point Flow: 1,757 MMcf/d Flow: 1,753 MMcf/d Flow: 784 MMcf/d LNG terminal Change: 0 MMcf/d Change: 0 MMcf/d Change: 0 MMcf/d Utilization: 99.7 % Utilization: 90.5 % Utilization: 67.8 % Natural gas pipeline

U.S. LNG Imports

LNG imports can be a key marginal source of supply during times of high demand. On peak demand days, imported LNG can contribute up to 35% of New England's natural gas supply.

"..For high frequency and/or long duration constraints, one of the most economic mitigation measures, in lieu of adding backup fuel capability, may be the installation of additional pipeline capability..."

So, what is the end use of all this infrastructure?

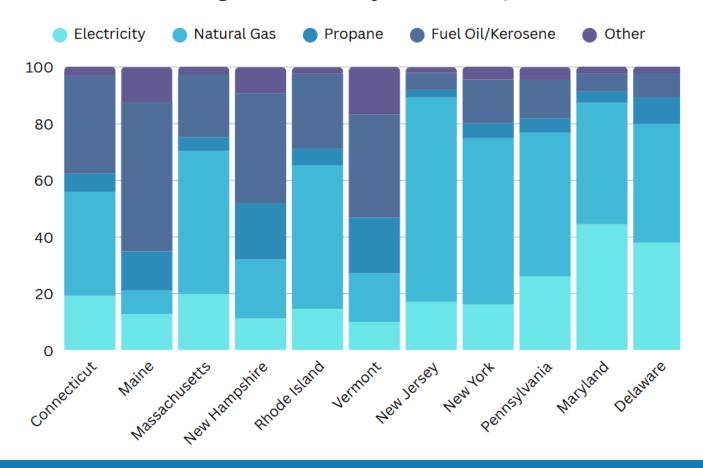

The Northeast Gas Heating Market

Heating Fuel Source By State (2023, EIA)

The Northeast Electric Market

New England Electric Generation by Fuel Source, 2023

Natural Gas: 55%

Nuclear: 23%

Renewables: 12%

• Wind: 4%

• Refuse: 3%

• Wood: 2%

• Solar 4%

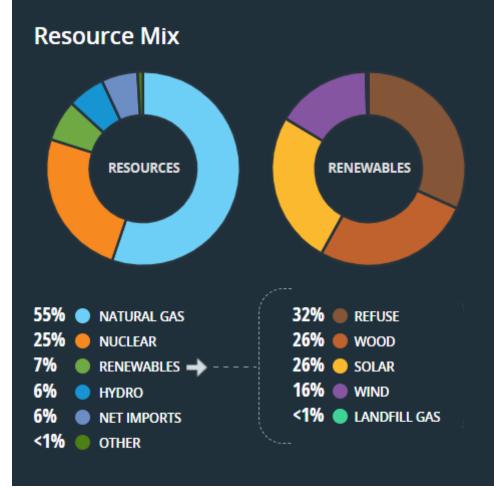

• Landfill Gas: 0.45%

• Hydro: 10%

• Other: 5%

• Oil: 0.32%

Coal: 0.2%

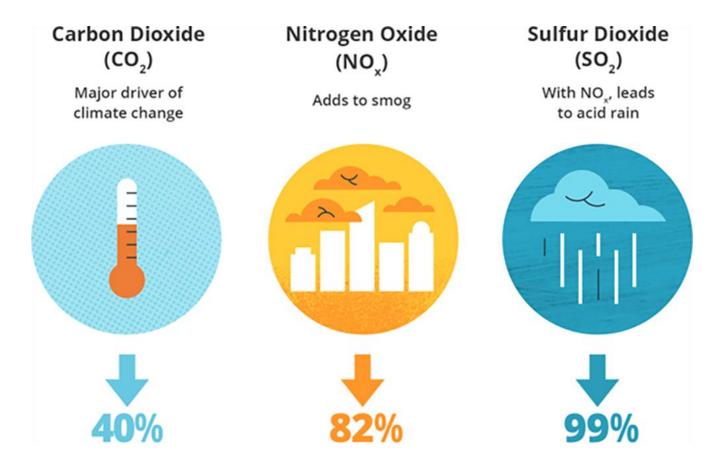

ISO-NE Resource Mix, Sept 8, 2025, 6:00PM

New England Generator Emissions – 2001 vs 2023

"The biggest contributor has been the region's shift to lower-emitting, highly efficient natural-gas-fired generation."

-ISO-New England

Natural Gas: Affordable Home Heating

Energy expenditures for space heating and other end uses (winter 2024–25)

For homes where the main heating fuel is...

Economic Impacts

State	% customers save heating with natural gas (vs electric)	# of jobs supported by natural gas industry
Connecticut	48%	7,371
Maine	50%	570
Massachusetts	67%	14,932
New Hampshire	58%	873
Rhode Island	59%	2,126
Vermont	64%	267
New Jersey	62%	25,831
New York	65%	36,647
Pennsylvania	45%	53,553
Maryland	32%	7, 718
Delaware	40%	449

Reliability - Meeting Peak Demand

Natural gas delivers nearly 4x more energy than the electric system on peak days

Daily Energy Delivered — Electric vs. Natural Gas Trillion British Thermal Units Peak gas Gas peak vs. electric peak: Electricity Delivered
 Natural Gas Delivered 3.7× larger 150 125 100 75 Peak electric 50 25 2019 2020 2021 2022 2023 2024 2025 2026

Source: AGA Winter Heating Outlook

Reliability

"NERC has long stated that natural gas is essential to the reliability of the grid during the electricity industry's unprecedented transformation."

-North American Electric Reliability Council 9/6/2024

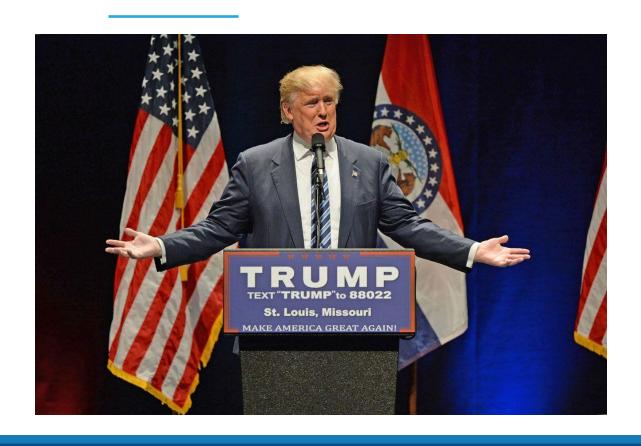

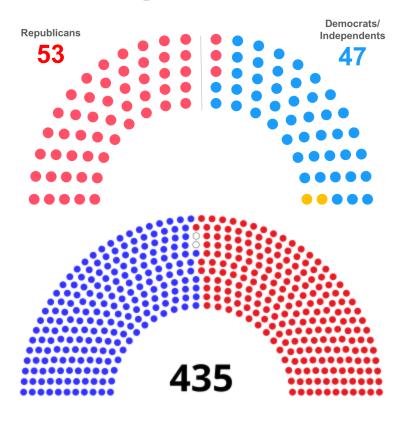

Federal and State Divide

What's Going on in Washington, DC?

Climate Goals

All states in the region, **except for New Hampshire**, have announced economy-wide Net Zero targets that were established through legislation or executive declaration.

Future of Gas Proceedings

Other Regulatory Proceedings

LDCs must navigate myriad other regulatory requirements and structures, including:

- Pipeline Safety Rules
- OQ Rules
- Permitting rules
- Ratemakings
- Building Codes
- Clean Heat Standards
- "Affordability" actions

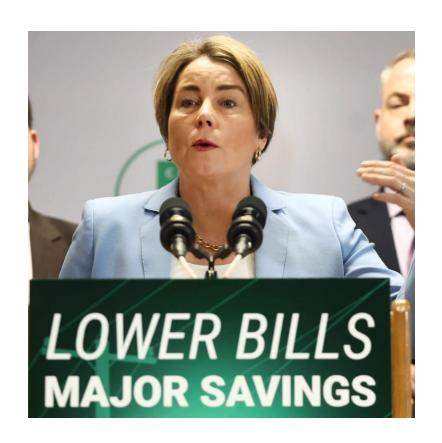

Legislative Action

Gas Customer Growth

Residential Customer Additions by State in 2022 (Thousands)

Rank	State	Additions
1	Texas	82.6
2	Ohio	51.8
3	California	47.8
4	Florida	35.9
5	New York	29.5
6	Arizona	28.0
7	Utah	27.3
8	New Jersey	26.2
9	South Carolina	25.5
10	Colorado	24.5
11	North Carolina	22.2
12	Minnesota	21.5
13	Washington	19.3
14	Indiana	18.7
15	Pennsylvania	16.8
16	Wisconsin	16.4
17	Nevada	13.7
18	ldaho	12.9
19	Virginia	11.9
20	Marvland	11.8

Residential Gas Customer Growth Change in Residential End Users

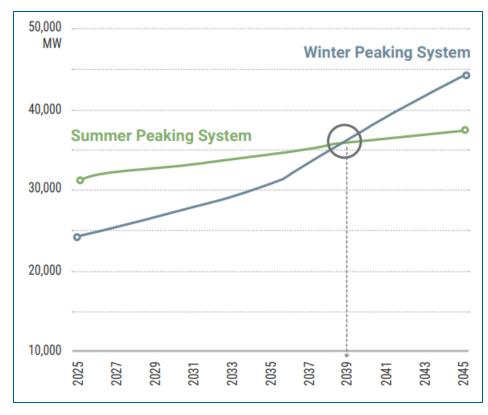

State	1 Year 2022-23	10 Year Average 2012-23
Connecticut	3,866	7,909
Delaware	2,663	4,356
Maine	385	1,121
Maryland	5,666	10,653
Massachusetts	12,118	13,564
New Hampshire	2,294	1,789
New Jersey	29,192	27,297
New York	12,016	21,414
Pennsylvania	4,497	19,305
Rhode Island	1,946	1,769
Vermont	590	823
Total U.S.	618,043	643,333

Energy Growth

"Demand Growth is now higher than at any point in the past two decades."

> NERC 2024 Long-Term Reliability Assessment

NY-ISO 2025 Power Trends – Summer and Winter Peak Demand Forecasts

Energy Reliability

"New and expanded natural gas infrastructure is essential to help America avoid a grid reliability crisis."

-Former FERC Chairman Mark Christie
June 18, 2025

"I think we need to build, build, build. America needs every electron and every molecule of every type we can get, and we need more infrastructure to move it."

-FERC Chairman David Rosner September 18, 2025

The Pipeline

Welcome to The Pipeline, the New Home of NGA's Statistical Guide.

The Pipeline serves as NGA's digital repository of facts, figures, and trends that tell the story of the Northeast natural gas industry.
